

STEYR AUG A3 SF

STEYR AUG A3 SF

The STEYR AUG A3 modular weapon system is the latest result of the continued development of the world renowned STEYR AUG rifle series. The STEYR AUG A3 design is also based on modular system components, which can be configured from one variant to another quickly and easily, without tools, and at unit level, in order to meet a wide range of future weapon requirements.

The "Bull Pup" design maintained its short overall length, without influencing the barrel length, to meet or exceed, required accuracy standards. The STEYR AUG A3 features a number of Picatinny rails (Mil. Std. 1913 rails), which allow the quick and easy mounting of various accessories, such as illumination and target acquisition devices, including a variety of optics or night vision devices.

Due to its utmost flexibility design concept, the STEYR AUG A3 is a state-of-the-art, multipurpose assault rifle, for day and night operations. Armed and special forces in about 35 countries in the whole world are trusting in the STEYR AUG

STEYR AUG A3 SF
