

STEYR HS .50

STEYR HS .50

The STEYR HS .50 opens a new era of long range shooting. The 33" (883mm) cold hammer forged barrel provides excellent accuracy at an effective range up to 1500 m and ensures supersonic velocity which guarantees a superior penetration power at long distance. The STEYR HS .50 can be field stripped easily within a few seconds for maintenance, or transportation purposes.

Once disassembled, the scope remains on the barrel, which prevents the need for zeroing the rifle again, after reassembling it. The rifle can be transported in a compact case, and is immediately ready for shooting, when reassembled. The low number of parts and the robust design of the weapon ensure flawless operation and easy maintenance. The unique configuration of the action

delivers a smooth and short cycling movement.

- Highly efficient muzzle brake, low recoil
- Fully adjustable bipod
- Special scope mounts for 1", 30 mm and 34 mm scope tube diameters
- Simple and rugged weapon system
- Ambidextrous
- Scope mounts for 1", 30 mm and 34 mm
